

Infrastructure Assessment

Business Need

Market conditions can often force business plans to change unexpectedly. Since businesses are IT dependent, an infrastructure assessment can be the key to ensuring your IT infrastructure is properly aligned with business goals.

Result

The result of the Infrastructure Assessment is a comprehensive report of the infrastructure's ability to support business goals. Clients receive a detailed findings report along with recommendations to improve the infrastructure's alignment with the client's business goals.

Value

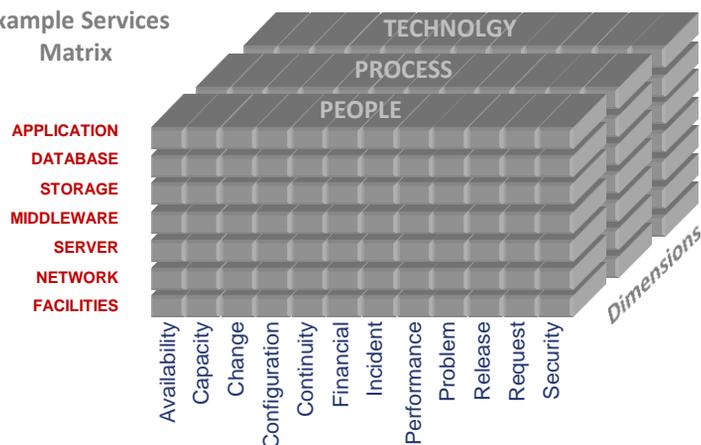

The Infrastructure Assessment provides decision makers with the information needed to make wise infrastructure investments that can dramatically improve their ability to achieve business success.

OVERVIEW

Highland Partners' assessment services are based upon three dimensions of knowledge domains, consisting of People, Processes and Technology combined with the IT Infrastructure Library (ITIL) of best practices. Any single infrastructure building block, as illustrated below, could be a key area of focus for a given assessment, depending on clients' specific business needs. Our expertise includes the interaction of applications and infrastructure and their ability to support our clients' business goals.

Highland Partners' Infrastructure Assessment Services are a robust suite of services customized to focus on the specific IT needs of our clients. Companies are realizing that they must carefully construct the building blocks of their IT infrastructures to ensure business operations achieve success. Highland Partners earns the confidence of its clients by recommending stable infrastructure designs that translate into a powerful business solution. Hence, any IT direction provided by our team of professionals will be directly tied to the business goals of our clients.
