

Project Management

Business Need

Competitive businesses often operate with lean staffs, making it difficult to engage the right skills at crucial points in time. Important projects often result in false starts or quickly become problematic.

Result

Highland Partners' project professionals listen to our clients' business and technical needs, develop a custom plan and execute its implementation using industry best practices.

Value

Clients are able to engage experienced project professionals when timing is essential and successfully achieve important business and technical objectives on time and within budget expectations.

OVERVIEW

Project Management is a general term that refers to both Program and Project Management. Program Management refers to the management of programs of work, which might include many projects and/or programs that are interrelated and must be managed as one program. Project Management refers to the management of one or more projects that are not interrelated, but must still be managed (independently) to achieve successful results. In general, project management is a structured approach to managing work using a repeatable process that enables repeatable successes when executed properly.

Highland Partners uses a project management methodology that is based on the Project Management Institute's (PMI) standards. PMI is the global association for project management professions. Their standards for developing sound project management techniques date back to 1969. All Highland Partners project professionals subscribe to PMI's project management standards due to its widespread success across the IT industry.

Employing well trained and skilled project management experts is an investment in the management of change. Change is often complex in today's high tech, high speed, highly competitive business environment. Companies can not afford for critical projects to fail. Choosing Highland Partners gives our clients confidence that industry best practices in project management will govern their most critical project and programs.
