

Position Description

Highland Partners Consulting LLC is an IT professional services company delivering IT solutions across a broad spectrum of industry groups. We are interested in candidates that are eager to support our team as we take on the tough challenges of our clients' complex IT needs. Candidates must appreciate and support a strong values system and adhere to conduct above reproach. At Highland Partners, we value our team members and provide rewards that are commensurate with performance.

The Oracle applications developer in this role will work with a small team of other developers within a small IT organization. However, candidates must be comfortable working on their own. Must have a verifiable history of successful application development results. Minimal travel required.

Required Skills and Experience

- Full product life-cycle experience to include development, integration, testing and documentation
- Minimum 4 years experience developing Oracle Forms and Reports
- Minimum 3 years with Apache Flex, JSP, Java and SQL Queries
- Experience developing custom solutions to meet business needs
- Strong analytical and problem solving skills to resolve complex software design issues and create new software for multiple products
- Skilled at developing and implementing operational procedures
- Ability to control scope and mitigate risks

Preferred Skills and Experience

- Strong organizational and coordination skills
- Effective communication skills with executive and technical levels
- Project management skills

Additional Details

- Must be willing to work onsite in Ft. Worth's HEB area
- Salary is approximately \$70K annually DOE
- Contract to hire arrangement – Expect a 3-month contract period
- Must be able to legally work in U.S. – No sponsorship offered

This position could be contingent upon newly signed business. This position could be subject to a 1099 work arrangement.
