

Highland Partners is an equal opportunity employer.

Sr. Consultant - IT Infrastructure

Location: Anywhere USA
Job Number: 71125-2542

Position Description

Highland Partners Consulting LLC is an IT professional services company delivering IT solutions across a broad spectrum of industry groups. We are interested in candidates that are eager to support our team as we take on the tough challenges of our clients' complex IT infrastructure needs. All candidates must appreciate and support a strong values system and adhere to conduct above reproach. At Highland Partners, we value our team members and provide rewards that are commensurate with contributions.

This role is accountable for leading IT infrastructure consulting engagements for our clients. The senior consultant, or the senior consultant and engagement team, is accountable for producing a deliverable at the end of the engagement that contains recommendations for improving the alignment of the client's IT infrastructure environment with their business strategy. Strong leadership skills are a requirement. Candidates for this role must have experience collecting clients' strategy information, performing discovery activities, assessing / documenting the client's current state, developing recommendations for aligning the infrastructure with the client's business strategy, producing a meaningful final report, and communicating findings and recommendations effectively. Consulting assignments often require high travel. Travel for this assignment is expected to be approximately 75 percent.

Minimum Required Skills and Experience

- Proven ability to lead consulting engagements with successful results
- Strong organization and coordination skills, as well as attention to detail
- Effective communication skills with executive and technical levels
- Must have a minimum of ten years experience in an IT environment
- Must have no less than two years leading consulting engagements
- Ability to lead teams without having direct line management authority
- Experience determining and communicating TCO and ROI
- Good analytical skills and expert knowledge of IT Industry trends

Preferred Skills and Experience

- A 15-year mix of operational, engineering, and consulting experience
- Experience in multiple technical domains
- BS or Masters degree in computer science or information technologies
- Industry recognized certifications, e.g., ITIL, ISO, SOX, Six Sigma, PMP

This position could be contingent upon newly signed business. This position could be subject to a 1099 work arrangement.
